

SACS BAR LABEL

Bar Code Production for Sage Line 50.

Introducing Bar Code Label, Customer Address, Delivery Address and Supplier Address Label Production linking directly with Sage Line 50 Products or Standalone.

SACS Bar Label utilises a range of reliable thermal/thermal transfer bar code printers or standard laser printers to produce a bar-coded representation of your Sage Line 50 Product Code.

The windows based interface software displays all product codes, descriptions, and Sales prices along with the current quantity in stock. This information can be sorted in ascending or descending order.

Single or multiple items can be selected, and the current quantity in stock, and one of each or a user defined amount of labels printed. An item search facility enables fast selection of products. All current settings are displayed for easy reference. Items, which are not in Sage Line 50 stock module also can be printed using temporary, stock table.
